

# Introduction to Management

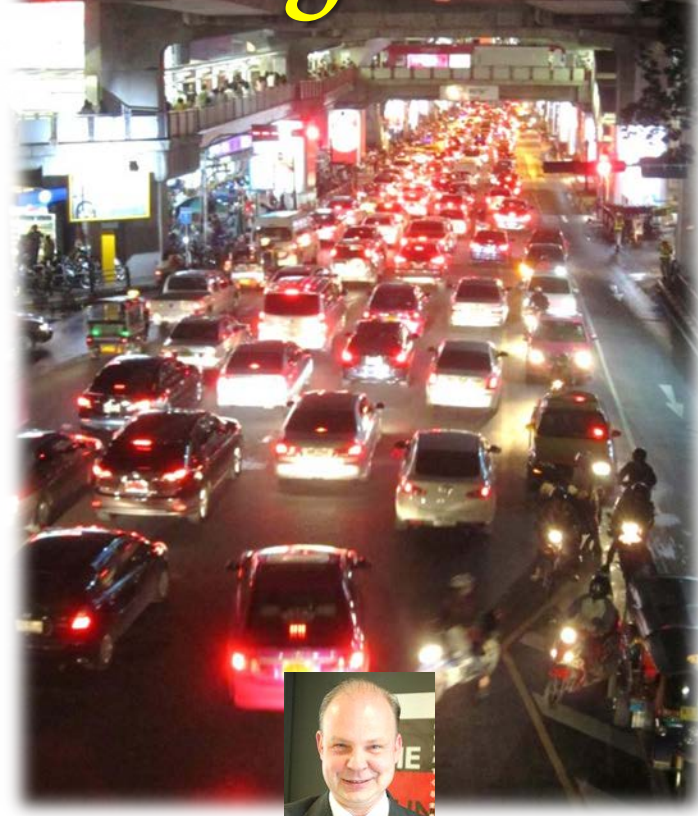

**Applied knowledge is power. Management gives the needed art to apply what we know. It makes aware our potentials and shows the way toward better accomplishment.**

☀ The class will give a brief overview on important fields of management such as marketing, planning, organization, and costing. Mathematics is not used in class.

☀ Every job is related to management. The class may contribute to an easier start in the first job in private enterprise, public service or the academic field.
