

BUSINESS LEADERS' SEMINAR

ビジネスリーダーズセミナー

LEVERAGING YOUR PH.D. IN INDUSTRY

Fri. February 27
14:00 - 15:30

Room 706, Laboratory of Advanced Research Building

総合研究棟A 706

Guest Speaker:

Dr. Adam Seger

Vice President, BioStinger, Inc.

Abstract:

Traditionally obtaining a Ph.D. has been used as an avenue to entering academia. In today's market a Ph.D. offers unique advantages in industry, which can often be overlooked by both potential employers and candidates themselves. Using his experiences as a graduate student, a postdoc, an employee at a biomedical startup, and finally a co-founder at a startup Dr. Seger will discuss what makes an advanced degree beneficial in industry and how to communicate these advantages to others. The differences in skills necessary for surviving and thriving in industry will be explored.

This seminar will be held as a part of the class
" World Science Leaders' Seminar" in Human Biology Program

Ph.D. Program in Human Biology
School of Interactive and Global Majors (SIGMA)
